IntentBridge — the headless agent layer for telcos

AIforce agents act across BSS/OSS through governed TM Forum Open APIs

Headless by design · no new screens

1 Engage

headless:
no new screen

Channels: Slackforce · Claudeforce (beta) · Agentforce Coworker · Salesforce Service & Sales consoles · Customer app / IVR

Personas: Care adviser · B2B account manager · NOC engineer · Field ops · Product manager · Customer

2 AIforce

agents

Superagent
front door · A2A

- Quoting & feasibility
- Care & billing
- Retention
- NOC copilot
- Field ops
- Product & catalogue
- Network-domain agents · via A2A

3 IntentBridge

headless agent layer on MuleSoft Agent Fabric

TMF Open APIs as governed MCP tools
agents call tools, never systems directly

Scoped access per ODA component
least privilege for every agent

TMF921 intent hand-off
probe → assess → activate with networks

Trust pack
policy as code

- £50 credit cap → supervisor
- Vulnerable customer → human
- SIM-swap risk hold
- PII masking
- Hash-chained audit
- Agent Evals release gate

Human in the loop

Supervisor queue

- Credits over £50
- Vulnerable customers
- SIM-swap holds
- Customer consent
- AM sign-off on quotes

approve / reject → audited

4 Systems

of record, mapped to ODA layers

unchanged:
no rip & replace

5 Outcomes

for the CIO

Lower cost to serve
Bills, credits and faults resolved in the tools people already use

Revenue protection
Retention offers within authority; credits governed by policy

Faster B2B quote-to-cash
Feasibility proven by TMF921 probe before the quote

Resilience & compliance
Ofcom · GDPR · EU AI Act · TSA
human oversight, full audit trail

TMF = TM Forum Open API · ODA = Open Digital Architecture · A2A = agent-to-agent

✓ Proven in a working model: 16/16 Apex tests · 100% coverage · live demo
