IntentBridge — the headless agent layer for telcos

AIforce agents act across BSS/OSS through governed TM Forum Open APIs

Headless by design · no new screens

People & channels
Engage, headless

Slackforce, Coworker, Salesforce consoles, customer app & IVR

No new screen: agents work where people already work

AIforce agents
Think & act

A Superagent front door plus specialist agents

Quoting, care & billing, retention, NOC, field ops, catalogue · A2A to network agents

IntentBridge
Govern & connect

TM Forum Open APIs as governed tools on MuleSoft Agent Fabric

Trust pack: credit cap, vulnerable-customer & SIM-swap holds, PII masking, audit

Existing BSS / OSS, CRM and network domains mapped to ODA layers, unchanged: no rip & replace

- **Lower cost to serve**
- **Revenue protection**
- **Faster B2B quote-to-cash**
- **Resilience & compliance**

Designed for Ofcom, GDPR, EU AI Act and TSA duties: policy as code, human oversight, hash-chained audit

✓ Proven in a working model: 16/16 Apex tests · 100% coverage · live demo
